3. У Харківському національному університеті імені В. Н. Каразіна відсутні виявлені раніше порушення Ліцензійних умов провадження освітньої діяльності закладів освіти.

4. **Наявність єдиного інформаційного середовища Харківського національного університету імені В. Н. Каразіна**, в якому відбувається забезпечення автоматизації основних процесів діяльності.

Єдине інформаційне середовище Харківського національного університету імені В. Н. Каразіна забезпечує автоматизацію основних процесів управлінської, освітньої, наукової та фінансово-господарчої діяльності.

4.1. Для забезпечення управління освітнім процесом використовують програмний комплекс «Єдина Державна Електронна База з питань освіти» (ЄДЕБО), за допомогою якого здійснюються облік абітурієнтів і супровід вступної кампанії, облік контингенту здобувачів вищої освіти та науково-педагогічних працівників, формування документів про освіту, ліцензій на провадження освітньої діяльності.

Окремо використовують: онлайн-систему звітування науково-педагогічних та наукових працівників; електронну форму реєстрації студентів на вибіркові міжфакультетські дисципліни.

У ХНУ імені В. Н. Каразіна електронне дистанційне навчання організовано на базі LMS Moodle. Система управління навчанням (LMS – Learning Management System) дозволяє виконувати такі функції:

- доставка інформації – електронний підручник, презентації, тематики форумів, контрольних та курсових робіт, календарний план вивчення дисципліни, критерії оцінок виконаних завдань, список літератури, оголошення, посилання, в тому числі і на відкриті освітні ресурси;
- комунікації – через форум, електронну пошту, чат;
- організація групової (форум, вікі-сторінки) й індивідуальної (обмін файлами) роботи студентів;
- контроль знань за допомогою тестування (тест-самоперевірка, тест-іспит).

На сьогодні Центр електронного навчання Інституту післядипломної освіти та заочного (дистанційного) навчання має Банк веб-ресурсів, що складається з 1 167 дистанційних курсів, які використано на заочній та денній формах навчання. Здійснюється навчання викладачів роботі з LMS Moodle. На базі LMS Moodle версії 2.8 реалізується система забезпечення моніторингу якості освіти, запуск програми «Ректорський контроль знань на базі платформи MOODLe Каразінського університету».

Центр електронного навчання відкрив та працює на каналі на YouTube Karazin Universarium, на якому розміщено презентаційні відеолекції провідних викладачів Університету, а також власний канал Інституту ELearningOpenKarazin.

4.2. В університеті впроваджено систему запобігання та виявлення академічного плагіату в наукових та навчальних працях співробітників і здобувачів вищої освіти. Для перевірки дипломних і дисертаційних робіт використовують антиплагіатну інтернет-систему Strikeplagiarism.com (власність компанії Plagiat.pl).

4.3. Із метою інформаційно-бібліотечного забезпечення навчальної та наукової роботи у Центральній науковій бібліотеці впроваджено сучасну АІБС Absotheque Unicode на необмежену кількість робочих місць із модулем електронного замовлення AbsOPAC, що дало змогу створити потужну систему автоматизованого обслуговування. Розвивається Електронна бібліотека, до складу якої входять: електронний каталог із посиланнями до повнотекстових документів; електронний архів (репозитарій) публікацій учених університету – eKhNUIR; електронний архів eScriptorium із повнотекстовими ресурсами рідкісних і цінних видань; світові бази даних в онлайн-доступі з усіх комп'ютерів університету: наукометричні – Scopus, Web of Science і повнотекстові бази даних іноземних та вітчизняних видавництв: CUL Online, EBSCO, Cambridge University Press, Institute of Physics Publishing, Royal Society Publ., Oxford University Press, SpringerNature; веб-сайт бібліотеки (<http://www-library.univer.kharkov.ua/ukr/>); колекція на CD і DVD-дисках.

Електронний каталог (понад 1 400 000 прим.) (<http://library.univer.kharkov.ua/OpacUnicode/index.php?lang=ua>) з електронним замовленням документів функціонує з цілодобовим доступом через мережу Інтернет. Щорічно поповнюється більш ніж на 60 000 записів. ЦНБ забезпечує супровід двох великих баз даних – електронного архіву праць учених (репозитарій) університету eKhNUIR (<http://dspace.univer.kharkov.ua/?locale=uk>) та електронного архіву рідкісних видань і рукописів для науки та освіти eScriptorium (<http://escriptorium.univer.kharkov.ua/?locale=uk>), створює Архів оцифрованих періодичних видань із фондів ЦНБ Karazin.Back2News із можливістю пошуку за текстами (<http://karazin.back2news.org>).
